*****ADDENDUM #2*****

SOLICITATION: PM6035
DUE DATE: 02/01/06
TIME: 5:00 P.M.
DESCRIPTION: Musk Thistle Weed Control at White Oak Mine Site - Scofield, Utah

Questions and Answers regarding this Solicitation.

Q: Can the work be done while driving an ATV?

A: No. Except for the access roads that lead to the sites, there is no vehicle access. The entire ground surface has been roughened/pocked with a backhoe bucket to create 1-2' deep depressions that encourage re-vegetation and discourage erosion.

Q: For the 50 Acre mine site is the road graveled so it would be passable during summer thunderstorms?

A: There is a potholed paved/gravel access road from SR264 that extends for approx. 1 mile to the 50 acre site. It would be passable in T-storms.

Q: Does the road still exist into the center of the 50 acre reclaimed area as shown on the map or does the road end at the edge of the reclaimed area?

A: The reclamation specs called for leaving the main access road in place (which is shown on Fig 2). I wasn't onsite during the last few weeks of reclamation, so I can't say whether the 500 feet or so of the road actually extends into the reclaimed area as shown on the map (Fig 2) or if it ends at the boundary of the reclaimed area. I will update the answer to this question soon.

Q: How would we access the 10-acre parcel?

A: They reclaimed this area during the last week or so of work, so I haven't seen the finished product here, either. I was told that they left a road into the smaller parcel that starts across the street from the road that goes west from SR96 and ends at the railroad tracks. All other access to this site is by foot. I will confirm the existence of this road soon.

*****END OF ADDENDUM*****

To acknowledge receipt of addendum, include a copy of this addendum with the proposal submittal or give written acknowledgment with the proposal. It shall be the responsibility of the respondent to appropriately disseminate this information to all concerned prior to the assigned due date and time.
